

TAHSIN JAWWAD

Waterloo, ON | +1 (647) 464-0630 | tahsin.jawwad23@gmail.com | [linkedin.com/in/tahsin-jawwad](https://www.linkedin.com/in/tahsin-jawwad) | github.com/tahsinj

EDUCATION

University of Waterloo

Master of Quantitative Finance

Waterloo, ON

Sep 2026 – Dec 2027 (expected)

- **Coursework:** Stochastic Calculus for Quantitative Finance, Estimation & Hypothesis Testing

University of British Columbia

BSc Honours, Computer Science (Minor in Data Science) | Average: **96.7%** (GPA **4.32/4.33**)

Kelowna, BC

Sep 2022 – Apr 2026

- **Awards:** Dean's List (2022–24), Dean's Scholar (2024–25); **\$110K** in scholarships incl. Int'l Major Entrance (\$80K)
- **Coursework (%)**: Stochastic Modelling & Simulation (99), Time Series & Forecasting (100), Applied Regression (100), Machine Learning (100), Matrix Algebra (99), Sampling & Design (99), Analysis of Algorithms (98)

The Winchester School, Jebel Ali

A Levels: **4 A*** (Best Across Three in the UAE) | IGCSE: **9 A*, 1 A**

Dubai, UAE

2022

- **Gold Medal** and **UAE Rank 1** (2019), UAE Rank 3 (2020), International Olympiad Foundation Mathematics Olympiad
- UAE team member, 16th **Hanoi Open Mathematics Competition**, Hanoi, Vietnam (2019)

QUANT RESEARCH

Statistical Arbitrage in Cryptocurrencies | *Python, pandas, NumPy, SciPy, statsmodels* | [code](#)

- Researched **47** momentum, reversal, order-flow and funding-carry strategy configurations on 2020–26 Binance spot/perp data; combined 3 sleeves into a walk-forward book with **1.46** lockbox Sharpe and **–0.02** BTC beta.
- Rebuilt the universe with all **585** active and delisted pairs, cutting lockbox Sharpe from **1.46** to **0.35** and exposing survivorship bias; funding carry held up at **1.68/2.42** Sharpe (dev/validation).
- Guarded against overfitting with a unit-tested Python backtester (1-day signal lag, 7–20 bps costs, limit-order fills), a time-ordered dev/validation/lockbox split, a trial registry and deflated Sharpe.
- Missed limit fills cost the order-flow sleeve **43%** of its price P&L and simulated market impact mostly erased its edge by **\$1M**; forward-testing a pre-registered carry-led v2 book since Oct 2026.

RESEARCH

Text-to-NoSQL via SQL (Honours Thesis; first-author manuscript) | *Java, Python, MongoDB*

- Cut translation failures **97%** (1,021 → 32 of 2,775 benchmark queries) with zero regressions by extending a rule-based SQL-to-MongoDB translator to joins, grouping, set operations and correlated subqueries.
- Reached **96.0%** execution accuracy from gold SQL and **88.4%** end-to-end on the 2,775-query TEND-Spider benchmark by resolving SQL tables to nested MongoDB collections and arrays.
- Traced **75%** of the gold-to-predicted accuracy loss to upstream Text-to-SQL errors by manually auditing 321 failures.

EXPERIENCE

Aether Automation Inc.

Junior Developer Co-op

Vancouver, BC

May 2025 – Dec 2025

- Cut manual workload **70%** by automating Zoho workflows (Deluge, Python, JavaScript) that sync data across teams.
- Cut email response time **60%** with an OpenAI-based classifier that triages customer inquiries and auto-drafts replies.

TECHNICAL SKILLS

Languages: Python, R, SQL, C++, Java

Libraries: pandas, NumPy, SciPy, statsmodels, scikit-learn, PyTorch, TensorFlow

Methods: Backtesting, time-series and regression analysis, walk-forward optimization, multiple-testing correction (deflated Sharpe), transaction-cost and market-impact modelling

Tools: Git, GitHub Actions, Docker, MySQL, MongoDB
